

N Sulphated Series

Catalogue No. M05 S02a

Lot ID GT108-JL093014

Structure

Chemical Formula C₃₆H₅₁N₃O₃₅S₂

Molecular Weight 1149.91 g/mol

Quantity 1 mg

Purity 99% by HPLC

Appearance Colorless solution when dissolved in water

Storage -20 °C or below. Avoid repeat freeze-thawing

Safety information We are not aware of any toxicity with this product. The material

should only be handled by qualified personnel trained in laboratory procedures and familiar with potential hazards. For laboratory

research use only. Not for human or drug use.

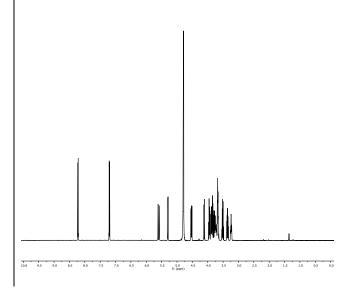

Description Structure-defined high-purity synthetic low molecular weight heparins

produced using the state of the art of enzymatic synthesis

M05 S02a is a saccharide with a UV chromophore that carries a p-

nitrophenyl group.
